## PROFILE

---

Experienced Backend Engineer with a strong background in building and managing backend systems using Golang, microservices architecture, and gRPC. Skilled in API development, automated testing, and system monitoring with Datadog on Google Cloud Platform (GCP). Familiar with both relational and NoSQL databases, as well as DevOps tools such as Docker and Git. Possesses strong critical thinking and problem-solving skills, with a solid understanding of data security best practices. Accustomed to working in Agile/Scrum teams and writing clean, secure, and efficient code.

## EDUCATION

---

### Brawijaya University

*Diploma Information System - Current GPA: 3.69/4.00*

*2019 - 2022*

## WORK EXPERIENCES

---

### PT Privy Identitas Digital

*Backend Engineer*

*May 2022 – May 2025*

- Developed and maintained backend APIs using Golang.
- Implemented microservices architecture and inter-service communication using gRPC.
- Automated API testing with pytest-bdd and Selenium for integration and regression test cases.
- Actively contributed to backend feature development as part of the tech team based in Yogyakarta.
- Participated in system monitoring and logging using Datadog, following observability best practices.

### Kompas Gramedia

*Web Developer Intern (Kampus Merdeka)*

*August 2021 – February 2022*

- Built and maintained WordPress-based websites.
- Developed virtual exhibits to support company initiatives.
- Created article content and automated the article publishing workflow on WordPress.
